

Rugged Computers

Meet the mission requirements of demanding environments

Transcend offers a comprehensive product line of rugged flash and DRAM memory modules. Our embedded solutions are tailored for military applications to withstand the harshest conditions, including thermal shock, vibration, and extreme temperatures, ensuring critical data remains accessible and secure at all times.

Enhanced Tolerance

30 μ m PCB gold fingers, corner bond & anti-sulfur technologies help endure environmental extremes.

Reliable Performance

Built-in ECC mechanism reduces the risk of single-bit error problems.

Highest Quality

Supplied by world-class chip manufacturers & subjected to rigorous temperature tests to ensure quality.

Featured Products

PCIe M.2 2280

MTE720T

PCIe M.2 2242

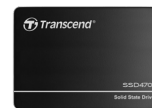

MTE460T

SATA III M.2 2242

MTS570T

SATA III 2.5"

SSD470K

DDR5 4800

R-DIMM
